How an Electric Bike Is Defined

- The state of Montana defines an electric bicycle as an "electric assisted bicycle." To be placed in this category, the motor must have a maximum speed of 20 mph. Both electric bicycles and traditional bicycles must adhere to the same rules of the road.

Licensing and Registration Requirements

- E-bikes are not required to meet the registration, licensing, or insurance requirements that standard motor vehicles are subject to.

Helmet Law

- Helmets are not required to operate an electric bicycle, and there is no minimum age requirement for e-bike riders.

Where Can I Ride My Electric Bike?

- E-bikes are allowed on both sidewalks and bike paths.
