	<i>Description: The proposed project consists of a phased replacement of the lab analyzers for St. Peters Health, as well as the installation of individual UPS units for each piece of equipment. Construction documents will reflect required demolition and new construction to support an interim phase where both the existing and new analyzers are operating concurrently during the calibration period, and the final installed condition with the new lab analyzers in place and the old equipment removed. Finishes will match SPH standards. Mechanically, existing systems are intended to be reutilized where possible.</i>

	<i>Description: The project is a new office for the Montana High School Association. This submittal is for demolition of the interior spaces to perimeter framing only with some minor exterior demolition items. The proposed project consists of the design for renovation of approximately 6,400 sf two-story office building on N. Last Chance Gulch in Helena, MT. Demolition scope will include full interior demolition of non-structural elements, finishes and systems. The existing freight elevator and overhead door will be replaced with new units. Exterior metal panels on the north and south elevations will be repaired and painted. Insulation and existing openings will be updated.</i>						
	<i>This set of drawings will allow the design team to investigate further into what will be necessary for the final design documents to be submitted at a later date.</i>
